ABOUT ME

A builder, not just a coder.

I am Christian James, a 4th-year BSIT student at Innovative College of Science and Technology, set to graduate in 2027. I build full-stack web and app systems and I am genuinely curious about applied AI. I take messy real-world problems - the kind that come with spreadsheets, phone calls, and paperwork - and turn them into software people actually use.

Hands-on builds like inventory, booking, and logistics systems have taught me that the best software starts with understanding the user day-to-day life.

CAREER GOAL

Grow into a full-stack developer who ships AI-augmented tools for small businesses and local government.

TECHNICAL SKILLS

Tools I actually use

(more can be added as my stack grows)

S-01

Languages

JavaScript

C#

Python

Java

W-02

Web & Frontend

React

Tailwind

Framer Motion

HTML / CSS

D-03

FEATURED CAPSTONE

Ibosys - Interactive Bongabong Ordinance System

FULL-STACK | RESEARCH | PUBLIC SECTOR

My capstone as researcher and full-stack developer: an ordinance library and monitoring system for the Municipality of Bongabong - search, archive, publish, and track local ordinances digitally instead of filing cabinets.

PROBLEM

Paper ordinance records are hard to find, verify, and monitor.

OBJECTIVE

Digitize, standardize, and surface local legislation.

IMPACT

Faster lookup for the public and the municipal office.

ERD PREVIEW

ordinances

id title status

categories

id name parent

users

id role ward

KEY MODULES

+ Ordinance library

+ Publish / archive

+ Search & filter

+ Reports & monitoring

Results

Digitized the ordinance lifecycle end-to-end and proved a reusable template for small-town governance systems.

Looking for a developer with momentum?

4th-year BSIT - full-stack web, app, and data systems. Available for OJT, freelance, or graduate roles.

CHRISTIAN JAMES D. GARCIA

FULL-STACK WEB & APP DEVELOPER | BSIT 2027

c537640@gmail.com | github.com/christian-james-garcia | facebook.com/christianjamescjcj

SUMMARY

Fourth-year BSIT student and full-stack developer who ships real systems: inventory, hotel booking, and waste-logistics platforms, plus an ordinance-management capstone for local government. Comfortable across the stack - React/Tailwind frontends, SQL Server & MongoDB data layers, and the Node.js glue in between.

TECHNICAL SKILLS

Frontend

React | Tailwind | Framer Motion | HTML | CSS

Languages & Tools

JavaScript | C# | Python | Git/GitHub | VS Code

Backend & Data

Node.js | REST APIs | SQL Server | MongoDB

Design & Docs

Figma | Canva | ERD modeling | Research writing

EXPERIENCE

Capstone Researcher & Full-stack Developer | 2026 - 2027

Ibosys - interactive ordinance system for the Municipality of Bongabong. Research, database design, full-stack build, and study documentation.

Class Officer - Auditor | 2023 - Present

Elected class auditor: financial records, receipts, and audits with integrity.

System Development Projects | 2024 - 2026

Gigi Fashion (inventory), Kamada (hotel management), Logistiwaste (waste logistics & recycling).

EDUCATION

Bachelor of Science in Information Technology (BSIT)

Innovative College of Science and Technology | 2023 - 2027 (expected)

CERTIFICATIONS

Credentials published on Credly - badge links to be added. Placeholder: Web Development, UI/UX, Database Foundations, Git.

ACHIEVEMENTS

Capstone researcher | Class officer (Auditor) | 3+ systems delivered | Research-driven problem solving

WEB DEVELOPER / APP DEVELOPER

Christian James D. Garcia

BSIT at Innovative College of Science and Technology. I build full-stack web and app systems for businesses and communities.

SWIPE TO EXPLORE

EXPERIENCE

Where I have applied the craft

2026 - 2027

Capstone Researcher & Full-stack Developer

Innovative College of Science and Technology | Ibosys project

Researched the problem space and built the interactive ordinance system end-to-end - from database design to the UI - while documenting the study for research.

React

SQL Server

Research

2023 - Present

Class Officer - Auditor

BSIT Class | ICST

Kept the class budget honest - managing records, receipts, and audits. Learned accountability, attention to detail, and clear communication under pressure.

Records

Audits

2024 - 2026

System Builds Team / Solo Dev

Gigi Fashion - Kamada - Logistiwaste

Designed and developed three working systems covering inventory, hotel booking, and waste logistics - scoping requirements from real processes.

React

MongoDB

SQL Server

Node.js

CERTIFICATIONS

Tip: badges 04 & 05 carry the same title - confirm the exact cert names and issue dates on Credly before finalizing.

ACHIEVEMENTS

Moments that shaped me

01

Capstone Researcher

Led research and documentation for Ibosys - defining the problem, methodology, and evidence the system solves it.

02

Leadership - Class Officer (Auditor)

Elected auditor of the class: managed financial records and audits with integrity.

03

Three systems, real operations

Shipped inventory, hotel, and logistics systems modeled on genuine business workflows.
