CHRISTIAN JAMES D GARCIA

WEB DEVELOPER | FULL-STACK DEVELOPMENT

[09661632714] | [cg537640@gmail.com]

CAREER OBJECTIVE

Bachelor of Science in Information Technology student seeking a Web Developer position to apply full-stack development skills in building practical, user-focused web applications. Brings experience in front-end, back-end, and database development and aims to contribute reliable, maintainable solutions while continuing to grow in the IT industry.

ACADEMIC / CAPSTONE PROJECTS

GIGI Fashion - Inventory Management System

Full-Stack Developer

Tech Stack / Tools: React, JavaScript, Tailwind CSS, Framer Motion, SQL Server, MongoDB

Action & Result: Contributed full-stack development for an inventory management system designed to organize and manage inventory information for a fashion-related business workflow.

KAMADA - Hotel Management System

Full-Stack Developer

Tech Stack / Tools: React, JavaScript, Tailwind CSS, Framer Motion, SQL Server, MongoDB

Action & Result: Contributed full-stack development for a hotel management system supporting hotel operations and centralized handling of operational information.

LogistiWaste - Waste Logistic and Recycling Management System

Full-Stack Developer

Tech Stack / Tools: React, JavaScript, Tailwind CSS, Framer Motion, SQL Server, MongoDB

Action & Result: Contributed full-stack development for a system focused on waste logistics and recycling management workflows.

IBOSYS - Interactive Bongabong Ordinance System

Full-Stack Developer | Researcher

Tech Stack / Tools: Full-stack web development technologies, including JavaScript and database technologies.

Action & Result: Contributed to the development of an interactive ordinance information system, working as a full-stack developer and researcher. The project focused on making local ordinance information more accessible through a web-based system.

ACHIEVEMENTS

Capstone Researcher

LEADERSHIP

Class Officer - Auditor
